AI Agentic Organization Transformation Journey

Accelerating Business Outcomes with AI

A 3 month end-to-end customer-centred AI Transformation Journey at the Microsoft Innovation Hub to help you understand what's possible, then make it real.

Business Envisioning

Week 0

Business Stakeholders (Finance, Procurement, HR...)

Microsoft Innovation Hub

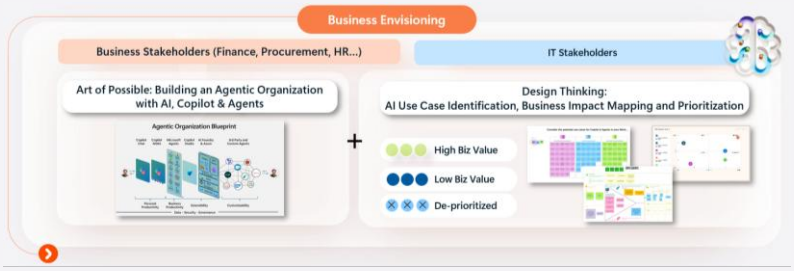
Microsoft

Business envisioning

Kickstart your AI journey and prioritize your use cases

Accelerate your AI Transformation journey through an interactive human-centred design thinking approach and explore how Copilot and Intelligent Agents can help your business drive strategic value.

This is the first phase of the AI transformation journey, where we engage business and IT leaders to explore what's possible with Microsoft AI. The session aims to inspire and co-create a shared vision, resulting in a prioritized set of high-impact AI opportunities and clear, actionable next steps to drive measurable business outcomes.



Example of how you might spend your day

Time	Agenda
0900 – 0930	Welcome + Introductions at Innovation Hub
0920 – 1020	AI, Copilot & Agents in <Industry / Function> Part 1
1020 – 1035	Break
1035 – 1200	AI, Copilot & Agents in <Industry / Function> Part 2
1200 – 1300	Lunch at Innovation Hub
1300 – 1330	Working Session: Business Priorities & Use Case Discovery
1330 – 1350	Working Session: Clustering & Prioritisation
1350 – 1420	Working Session: Use Case Business Impact Scoping
1420 – 1440	Working Session: Use Case Presentation
1440 – 1500	Working Session: Define Timeline & Next Steps
1500 – 1520	Closing & Next Steps

** Please be aware that the specified timings are a rough guideline. The schedule may be adjusted according to your organization's requirements*

Key Objectives

- Explore how AI and Agents can unlock new business value for your organization
- Identify a list of strategic AI use cases that will drive your AI Transformation Journey with mapped measurable business impact
- Define 3 quick-win high impact agentic use cases aligned with your business priorities

Potential topics

- **Industry Focused:** The Future of FSI with GenAI & Agents
- **LOB Focused:** Transforming Procurement with Copilot & Agents
- **Outcome Focused:** Transforming Employee Productivity with GenAI

Target Audience

Primarily those working in cross-functional teams targeting business domains (Sales, Engineering, Procurement, Finance, HR...)

- Business Decision Makers (BDMs)
- Line of Business Stakeholders (LOBs)
- Chief Information Officers (CIOs)
- Chief Technology Officers (CTOs)
- IT Decision Makers (ITDMs)
- Enterprise Architect (EA)

Workshop Details

- Duration: Half Day - 1 full day
- Venue: Microsoft Innovation Hub Singapore, Frasers Tower L12, 182 Cecil St, S069547
- Max Attendees: 20
- Prerequisites: Pre-Workshop Scoping Call
- Registration: Per Invite Only

Microsoft Innovation Hub

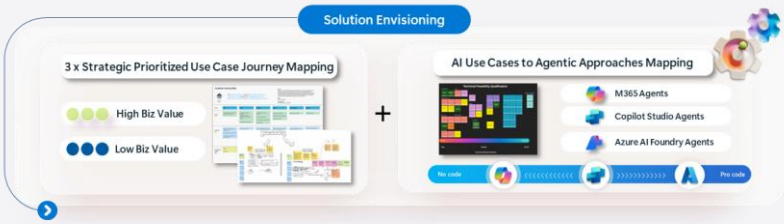
Microsoft

Solution envisioning

Define your solution

A strategic business and technical discussion to understand goals, offer insights, and imagine the solution with Microsoft and partner capabilities.

In the Solution Envisioning phase, the goal is to discover and define business process, goals and map suggested solution approaches of the prioritized AI use cases



Example of how you might spend your day

Time	Agenda
0900 – 0930	Welcome coffee + Setting the Scene at Innovation Hub
0930 – 1030	Discover and Define: Share Challenges & Priorities
1030 – 1045	Tea Break
1045 – 1145	Copilot & Agentic Solution Approaches
1145 – 1245	Discover and Define: Current - Use Case 1
1245 – 1345	Lunch at Innovation Hub
1345 – 1445	Discover and Define: Current - Use Case 2
1445 – 1515	Discover and Define: Current - Use Case 3
1515 – 1530	Tea Break
1530 – 1630	Discussion: Technical Complexity Mapping Discussion
1630 – 1645	Closing & Next Steps

** Please be aware that the specified timings are a rough guideline. The schedule may be adjusted according to your organization's requirements*

Key Objectives

- Expand and scope out prioritized high impact AI use cases, mapping out specific journey with LOBs
- Align the list of identified use cases with Copilot Agentic AI capabilities and solution
- Decide on the appropriate solution approaches based on current business and technical capabilities

Prerequisites

- A list of prioritized AI use cases with mapped business impact
- Share functional and non-functional requirements and scope before the workshop

Target Audience

Primarily those working in cross-functional teams targeting business domains (Sales, Engineering, Procurement, Finance, HR…)

- Business Decision Makers (BDMs)
- Line of Business Stakeholders (LOBs)
- Chief Information Officers (CIOs)
- Chief Technology Officers (CTOs)
- IT Decision Makers (ITDMs)
- Enterprise Architect (EA)

Workshop Details

- Duration: 1 Day
- Venue: Microsoft Innovation Hub Singapore, Frasers Tower L12, 182 Cecil St, S069547
- No. of Attendees: 3-12
- Registration: Per Invite Only

Microsoft Innovation Hub

Microsoft

Architecture design

Architect your solution

Synthesize the business and technical requirements for a solution including initial scope and alignment to reference architectures to drive next steps.

Architectural design engagements provide the AI foundation architecture including generative AI building blocks. Customer should walk away with a 3-tier GenAI solution layer: Core (constant technology elements such as security & monitoring), Variable (use case specific components such as application orchestrators) and Solution-Dependent (elements such as AI models & applications).

How you might spend your day

Time	Agenda
08:45 – 09:00	Welcome coffee at the Innovation Hub Singapore
09:00 – 09:30	Aims and objective
09:30 – 10:00	Copilot Agentic AI showcases
10:00 – 10:15	Reflections
10:15 – 10:30	Break
10:30 – 10:45	Current state and future vision
10:45 – 11:45	Architecture design - solution mapping
11:45 – 12:00	Wrap up and next steps

Key takeaways

- Design Target Architecture blueprint to use Agentic AI within customer tenant.
- Design Governance Model and Target Operating Model for Agentic AI CoE & AI Factory.
- Review identified use cases and requirements to define the Sandbox Environment and for the Rapid Prototype Workshop.

Prerequisites

- Up to 3 identified prioritized high business impact use cases (Outcome of business and solution envisioning workshop)
- Clear and technical requirements
- Governance and operating model alignment
- Architecture maturity baseline for readiness
- Stakeholder alignment artefact: Documented agree on scope, goals and success metrics

Target Audience

Primarily those working in cross-functional teams targeting Copilot & Agents AI Centre of Excellence and AI factory domain

- Chief Information Officers (CIOs)
- Chief Technology Officers (CTOs)
- IT Decision Makers (ITDMs)
- Enterprise Architect (EA)
- Data Scientist
- Business Decision Makers (BDMs)

Workshop Details

- Duration: ½ Day -2 days
- Venue: Microsoft Innovation Hub Singapore, Frasers Tower L12, 182 Cecil St, S069547
- No. of Attendees: 3-12

Microsoft Innovation Hub

Microsoft

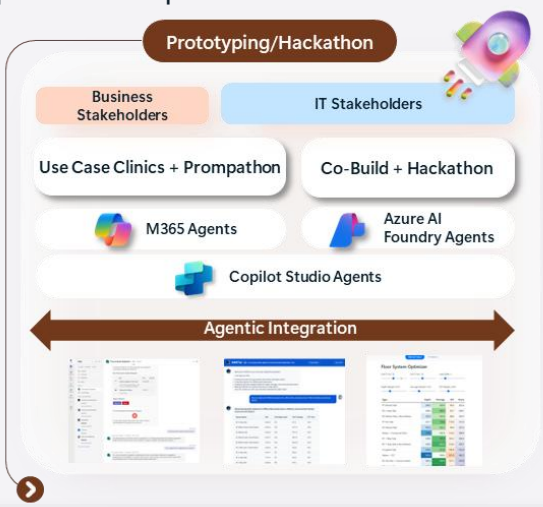
Rapid prototype session

Validate capabilities

Demonstrate key technical capabilities of a solution and address challenges to accelerate decision-making.

The journey culminates in the Rapid Prototype phase, where key technical capabilities of the solution are demonstrated. This phase is crucial for validating the proposed solution's capabilities and addressing any challenges that may arise.

By providing a tangible prototype, this stage accelerates the decision-making process, allowing stakeholders to see the potential impact of the solution firsthand.



How you might spend your day

Time	Agenda (Day 1 to Day X)
08:45 – 09:00	Welcome coffee at the Innovation Hub Singapore
09:00 – 10:30	Kick-off & Setting the Stage
10:30 – 10:45	Break
10:45 – 12:00	Sprint Work
12:00 – 13:00	Lunch at the Innovation Hub Singapore (L12)
13:00 – 14:45	Sprint work
14:45 – 15:00	Break
15:00 – 16:00	Sprint work
16:00 – 17:00	Daily sprint review

Key takeaways

- Build selected Agents within your tenant.
- Instrument agentic framework across different agentic technology (M365, Copilot Studio, Azure AI Foundry) using Semantic Kernel.

Prerequisites

- Sandbox Environment (M365 Copilot License/ PP License /or Azure tenant) is established within the customer tenant and all workshop attendees have access and required licenses applied.
- Mixed Team for Copilot Agents with at least one business and IT owner to work and collaborate during the workshop.
- Mixed team of key business users and developer for pro-code co-build with AI Agents and agentic integration using Semantic Kernel
- Clear architecture design with aligned scope for prototype (*outcome of Architecture Design workshop*)
- Identified co-builders for follow up after prototyping session (can be done with technical co-build investment by customer)

Target audience

Primarily those working in cross-functional teams targeting Copilot Agentic AI Center of Excellence and AI Factory domain.

- Business Decision Makers (BDMs)
- Line of business stakeholders
- Platform Service Owners (SM)
- IT Decision Makers (ITDMs)
- Enterprise Architect (EA)
- Developers
- Data Scientists

Workshop details

- Duration: 1-3 days
- Venue: Microsoft Innovation Hub Singapore, Frasers Tower L12, 182 Cecil St, S069547
- Hybrid: possible
- No. of attendees: 6-12 split into 2-3 teams
